PROFESSIONAL SUMMARY

AI & ML Engineering student with a proven track record of architecting and deploying full-stack, ML-integrated systems end-to-end. Demonstrates strong command of Data Structures, Algorithms, and OOP principles through multiple shipped projects. Proficient in C++, Python, and JavaScript — brings an analytical, detail-oriented approach to diagnosing problems, interpreting data trends, and formulating effective solutions in fast-paced, results-driven environments.

EDUCATION

B-Tech. in CSE(Artificial Intelligence & Machine Learning) *Sept 2023 – 2027*

Nalla Narasimha Reddy Group of Institutions, Hyderabad | Current CGPA: 8.52

12th Grade — 97% *2021 – 2023*

Sri Chaitanya Junior College

10th Grade — CGPA 10/10 *2016 – 2021*

Krishnaveni Talent School

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, OOP & Design, DBMS, Operating Systems

Languages: C++, Python, Java, C, R, JavaScript, MySQL

Web Technologies: React, Node.js, Express.js, HTML5, CSS3

ML / AI: TensorFlow, PyTorch, Scikit-learn, NLP, CNN, Predictive Modelling, NumPy, Pandas

Tools & Platforms: Git, GitHub, Firebase, Cloudinary, Jupyter Notebook, VS Code, MATLAB

PROJECTS

FitBite — AI-Powered Food Nutrition & Estimation System

React.js | TensorFlow | CNN | Firebase | Node.js | MySQL

- Architected a 4-stage AI pipeline (Image Acquisition → Preprocessing → CNN Food Recognition → Nutrition Estimation), applying OOP design principles across all modules.
- Trained a CNN on labelled datasets using TensorFlow; engineered data preprocessing (noise removal, normalisation, image enhancement) to optimise model accuracy.
- Built and deployed a full-stack React/Firebase application with real-time analytics dashboard; validated all 5 core modules via UAT — 100% pass rate.

AI-Powered Healthcare Chatbot

Java | NLP | React | Node.js/Express | MySQL

- Engineered a full-stack NLP chatbot using OOP patterns in Java, integrating intent classification with a React frontend and Node.js/Express backend.
- Designed MySQL schema to persist session state and query history; implemented voice and text input, enabling real-time contextual responses with personalised UX.

Car Rental System — Full-Stack Web Application

C++ | Node.js | MySQL | JWT | Cloudinary

- Developed end-to-end rental platform with JWT-based authentication and real-time vehicle availability; optimised SQL queries to measurably reduce page load time.
- Applied object-oriented design for booking and payment modules; integrated Cloudinary for scalable cloud image storage.

Online Ticket Booking System

C++ | JavaScript | HTML | CSS

- Built seat-selection engine in C++ using OOP (classes, inheritance, encapsulation) with dynamic seat-map rendering in vanilla JavaScript.
- Integrated third-party payment and authentication APIs; implemented webhook listeners for real-time booking confirmation events.

BuyVerse – E-Commerce Web Application

HTML | CSS | JavaScript

- Developed a responsive and user-friendly e-commerce web application that allows users to browse products, view detailed product pages, and simulate a smooth online shopping experience.
- Focused on creating a clean UI/UX with responsive design principles to ensure compatibility across devices.
- The project demonstrates front-end development skills, DOM manipulation, and basic e-commerce workflow understanding.

LEADERSHIP & EXPERIENCE

TARA 2025 — Event Co-ordinator

2025

- Managed end-to-end logistics for 200+ attendees; led social media outreach campaign that drove a 30% increase in participant registrations.

App Development Club — Core Team Member

- Conducted monthly workshops on open-source development tools for 50+ members; grew active contributors by 40% through structured mentoring.

NNRG Model United Nations — Organiser & Delegate

2024

- Organised committee sessions and represented AIIPM; strengthened research, negotiation, and public communication skills in a high-stakes, collaborative environment.

TECH FEST 2026 — Event Co-ordinator

2026

- Coordinated and managed technical fest events, handling event planning, team collaboration, participant coordination, logistics, and smooth execution while demonstrating leadership, communication, and organizational skills.

CERTIFICATIONS

Front-End Web Development — IBM

MongoDB Skill-a-thon — MongoDB University
